

SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR
(AUTONOMOUS)

B.Tech I Year I Semester Supplementary Examinations February-2024

ENGINEERING PHYSICS

(Common to CE & AGE)

Time: 3 Hours

Max. Marks: 60

(Answer all Five Units 5 x 12 = 60 Marks)

UNIT-I

- | | | | | | |
|---|---|----------------------------------------------------------------------------------------------|-----|----|----|
| 1 | a | state and explain principle of superposition. | CO1 | L1 | 6M |
| | b | Define interference and summarizing the importance conditions to get sustained interference. | CO1 | L1 | 6M |

OR

- | | | | | | |
|---|---|---------------------------------------------------------------------------------------------------------------------------------|-----|----|----|
| 2 | a | Describe Fraunhofer diffraction due to double slit and derive the conditions for principal maxima, secondary maxima and minima. | CO1 | L2 | 8M |
| | b | Compare Interference and Diffraction. | CO1 | L3 | 4M |

UNIT-II

- | | | | | | |
|---|---|---------------------------------------------------------------------------------------|-----|----|----|
| 3 | a | Define (i) Unit cell (ii) space lattice (iii) Bravais Lattice (iv) Lattice parameters | CO2 | L1 | 4M |
| | b | Show that FCC is mostly closed packed structure than BCC and SC. | CO2 | L3 | 8M |

OR

- | | | | | | |
|---|---|------------------------------------------------------------------------------------------------------------|-----|----|----|
| 4 | a | What is Bravais lattice? What are the different space lattice in the cubic system. | CO2 | L1 | 8M |
| | b | For a cubic system, if 'a' is the lattice constant, then find the interplanar separation for (111) planes. | CO2 | L1 | 4M |

UNIT-III

- | | | | | | |
|---|---|-----------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|----|
| 5 | a | What are the basic requirements of acoustically good hall? | CO3 | L1 | 8M |
| | b | A class room of volume 360 m ³ has a reverberation time 1.6 seconds. Calculate the total sound absorption coefficient of the class room? | CO3 | L4 | 4M |

OR

- | | | | | | |
|---|---|----------------------------------------------------------------|-----|----|----|
| 6 | a | Explain Piezoelectric effect. | CO3 | L1 | 6M |
| | b | How ultrasonics are produced by using piezoelectric generator? | CO3 | L1 | 6M |

UNIT-IV

- | | | | | | |
|---|---|-----------------------------------------------------------------------------------------------|-----|----|----|
| 7 | a | Define the following
i) Elasticity ii) isotropic materials iii) Plasticity iv) Hooke's law | CO4 | L1 | 4M |
| | b | Derive the relation between different elastic moduli. | CO4 | L3 | 8M |

OR

- | | | | | | |
|---|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|----|
| 8 | a | Define shear strain. Explain how shear strain is related to modulus of rigidity. | CO4 | L1 | 8M |
| | b | Estimate the work done in stretching a wire of cross section 1.25 mm ² and length 1.9 m through 0.14 mm. The Young's modulus of wire is 45 x 10 ⁹ N/m ² . | CO4 | L4 | 4M |

UNIT-V

- | | | | | | |
|---|---|------------------------------------------|-----|----|----|
| 9 | a | Write the properties of Superconductors. | CO5 | L3 | 4M |
| | b | Explain BCS theory of superconductors. | CO5 | L1 | 8M |

OR

- | | | | | | |
|----|---|-------------------------------------------------------------------|-----|----|----|
| 10 | a | What are the techniques available for synthesizing nanomaterials? | CO5 | L1 | 6M |
| | b | Explain ball milling technique for synthesis of nanomaterial? | CO5 | L1 | 6M |

*** END ***
