

Reg. No: 

--	--	--	--	--	--	--	--	--	--

**SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR  
(AUTONOMOUS)**

**B.Tech II Year I Semester Supplementary Examinations November 2020  
ENGINEERING MECHANICS  
(Electronics & Communication Engineering)**

Time: 3 hours

Max. Marks: 60

**PART-A**

(Answer all the Questions **5 x 2 = 10** Marks)

- |          |   |
|----------|---|
| <b>1</b> | <ul style="list-style-type: none"> <li><b>a</b> Define Moment and Couple. <span style="float: right;">2M</span></li> <li><b>b</b> Define Static Friction. <span style="float: right;">2M</span></li> <li><b>c</b> Define Centroid and Centre of Gravity. <span style="float: right;">2M</span></li> <li><b>d</b> Define Curvilinear and Rectilinear Motion. <span style="float: right;">2M</span></li> <li><b>e</b> Define Kinetics. <span style="float: right;">2M</span></li> </ul> |
|----------|---|

**PART-B**

(Answer all Five Units **5 x 10 = 50** Marks)

**UNIT-I**

- |          |   |
|----------|---|
| <b>2</b> | <ul style="list-style-type: none"> <li><b>a</b> Classify different system of forces with suitable examples. <span style="float: right;">5M</span></li> <li><b>b</b> State and prove parallelogram law of forces. <span style="float: right;">5M</span></li> </ul> |
|----------|---|

**OR**

- |          |  |
|----------|--|
| <b>3</b> | <p>A simply supported beam AB of span 6 m is loaded as shown. Determine the reactions at A and B. <span style="float: right;">10M</span></p> |
|----------|--|

**UNIT-II**

- |          |   |
|----------|---|
| <b>4</b> | <p>A body, resting on a rough horizontal plane, required a pull of 180 N inclined at 30° to the plane just to move it. It was found that a push of 220 N inclined at 30° to the plane just moved the body. Determine the weight of the body and the coefficient of friction. <span style="float: right;">10M</span></p> |
|----------|---|

**OR**

- |          |   |
|----------|---|
| <b>5</b> | <ul style="list-style-type: none"> <li><b>a</b> Write short note on differential screw jack with neat sketch <span style="float: right;">5M</span></li> <li><b>b</b> A screw jack raises a load of 40 KN. The screw is square threaded having three threads per 20 mm length and 40 mm in diameter. Calculate the force required at the end of a lever 400 mm long measured from the axis of the screw, if the coefficient of friction between screw and nut is 0.12 <span style="float: right;">5M</span></li> </ul> |
|----------|---|

**UNIT-III**

- |          |                                       |
|----------|---------------------------------------|
| <b>6</b> | <p style="text-align: right;">10M</p> |
|----------|---------------------------------------|

Determine the centroid of the area shown with respect to the axis shown.

**OR**

- 7 An I-section is made up of three rectangles as shown in Fig.15 Find the moment of inertia of the section about the horizontal axis passing through the center of gravity of the section

10M

**UNIT-IV**

- 8 Derive an equation for moment of inertia of the following sections about centroidal axis:  
 i) A rectangular section  
 ii) A triangular section from its base

10M

**OR**

- 9 A rectangular hole is made in a triangular section as shown in Fig.24. Determine the moment of inertia of the section about X-X axis passing through its center of gravity and the base BC.

10M

**UNIT-V**

10

10M

A plane is loaded & supported as shown. Determine the nature and magnitude of the forces in the members' 1,2 and 3

**OR**

- 11 Explain the procedure to find forces in members of truss by using method of joints.

10M
