

**SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR**  
(AUTONOMOUS)  
**B.Tech III Year II Semester Regular Examinations August-2023**

**EMBEDDED SYSTEMS AND IoT**  
(Electronics & Communication Engineering)

Time: 3 Hours

Max. Marks: 60

(Answer all Five Units 5 x 12 = 60 Marks)

**UNIT-I**

- |   |                                                                          |     |    |    |
|---|--------------------------------------------------------------------------|-----|----|----|
| 1 | a With a neat diagram, explain the design process of an embedded system. | CO1 | L2 | 6M |
|   | b Explain the RS-232 and RS-485 interfaces in embedded systems.          | CO1 | L2 | 6M |

OR

- |   |                                                                                            |     |    |    |
|---|--------------------------------------------------------------------------------------------|-----|----|----|
| 2 | a Define embedded system and Write any four important characteristics of embedded systems. | CO1 | L1 | 6M |
|   | b Distinguish between Von-Neumann and Harvard architecture.                                | CO1 | L2 | 6M |

**UNIT-II**

- |   |                                                                 |     |    |    |
|---|-----------------------------------------------------------------|-----|----|----|
| 3 | a Explain in brief IoT applications.                            | CO2 | L2 | 6M |
|   | b Compare the protocols associated with transport layer of IoT. | CO2 | L2 | 6M |

OR

- |   |                                                                                                            |     |    |    |
|---|------------------------------------------------------------------------------------------------------------|-----|----|----|
| 4 | a Illustrate the Physical design with an generic block diagram of an IoT device and explain it briefly.    | CO2 | L2 | 6M |
|   | b Describe the implementation of IoT technology in Health and life style as health and fitness monitoring. | CO2 | L2 | 6M |

**UNIT-III**

- |   |                                                              |     |    |    |
|---|--------------------------------------------------------------|-----|----|----|
| 5 | a Develop a program to control DC motor using PWM technique. | CO3 | L3 | 6M |
|   | b Write a program for Arduino to work as a Timer.            | CO3 | L3 | 6M |

OR

- |   |                                                                           |     |    |    |
|---|---------------------------------------------------------------------------|-----|----|----|
| 6 | a What are the software structure functions in Arduino?                   | CO3 | L1 | 6M |
|   | b Draw the structure of Software defined networking for IoT & Explain it. | CO3 | L2 | 6M |

**UNIT-IV**

- |   |                                                                                                                                                |     |    |     |
|---|------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|-----|
| 7 | Describe the following steps involved in IoT system design methodology:<br>(i) Purpose & Requirements Specification (ii) Process Specification | CO4 | L2 | 12M |
|---|------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|-----|

OR

- |   |                                                                                       |     |    |    |
|---|---------------------------------------------------------------------------------------|-----|----|----|
| 8 | a Describe the packages used in python.                                               | CO4 | L2 | 6M |
|   | b Distinguish between procedure-oriented programming and object-oriented programming. | CO4 | L2 | 6M |

**UNIT-V**

- |   |                                                                                                                                                                    |     |    |     |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|-----|
| 9 | Design and development of an automatic refrigerator light system with LED, switch & raspberry pi and write a python program to support the working of that design. | CO5 | L6 | 12M |
|---|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|-----|

OR

- |    |                                                                     |     |    |    |
|----|---------------------------------------------------------------------|-----|----|----|
| 10 | a Illustrate how to interface a switch to raspberry pi.             | CO5 | L3 | 6M |
|    | b Mention the flavors of Linux OS supported by Raspberry pi device. | CO5 | L1 | 6M |
