

**SIDDHARTH INSTITUTE OF ENGINEERING & TECHNOLOGY:: PUTTUR**  
(AUTONOMOUS)

**B.Tech. II Year I Semester Regular & Supplementary Examinations November-2025**  
**NUMERICAL & STATISTICAL METHODS**  
(Civil Engineering)

**Time: 3 Hours****Max. Marks: 70****PART-A**(Answer all the Questions **10 x 2 = 20 Marks**)

- |   |   |  |     |    |    |
|---|---|--|-----|----|----|
| 1 | a | Write the formula to find the root of an equation by Regula Falsi method.                  | CO1 | L1 | 2M |
|   | b | Solve by Jacoby method [Only two iterations] $x+y=$ ; $x-2y=4$ .                           | CO1 | L3 | 2M |
|   | c | Write Newton's forward interpolation formula.  | CO2 | L1 | 2M |
|   | d | State the two normal equation used in fitting a straight line.                             | CO2 | L1 | 2M |
|   | e | Write Taylor's formula for $y(x_1)$ to solve $y' = f(x, y)$ with $y(x_0) = y_0$            | CO3 | L1 | 2M |
|   | f | Find $y^{(1)}(x)$ by Picards's method , given that $\frac{dy}{dx} = 1 + xy$ ; $y(0) = 1$ . | CO3 | L1 | 2M |
|   | g | Define Population and size of population.  | CO5 | L1 | 2M |
|   | h | Define unbiased estimator.   | CO5 | L1 | 2M |
|   | i | Define Large sample.   | CO6 | L1 | 2M |
|   | j | Define alternate hypothesis.   | CO6 | L1 | 2M |

**PART-B**(Answer all Five Units **5 x 10 = 50 Marks**)**UNIT-I**

- |           |  |     |    |     |
|-----------|--|-----|----|-----|
| 2         | Find a real root of the equation $x \tan x + 1 = 0$ using Newton – Raphson method.                     | CO1 | L1 | 10M |
| <b>OR</b> |  |     |    |     |
| 3         | Apply Gauss Siedel iteration method to solve equations $20x+y-2z=1$ ; $x+20y-z=-18$ ; $2x-3y+20z=25$ . | CO1 | L3 | 10M |

**UNIT-II**

- |   |  |     |    |     |
|---|--|-----|----|-----|
| 4 | Fit a second degree polynomial to the following data by method of least square | CO2 | L3 | 10M |
|---|--|-----|----|-----|

x	0	1	2	3	4
y	1	1.8	1.3	2.5	6.3

**OR**

- |   |   |     |    |     |
|---|---|-----|----|-----|
| 5 | Using Lagrange's interpolation formula, find the value of $y(10)$ from the following table: | CO2 | L3 | 10M |
|---|---|-----|----|-----|

x	5	6	9	11
y	12	13	14	16

**UNIT-III**

- |   |   |     |    |     |
|---|---|-----|----|-----|
| 6 | Using modified Euler's method find $(0.2)$ and $y(0.4)$ , given $y' = y + e^x$ , $y(0)=0$ . | CO4 | L3 | 10M |
|---|---|-----|----|-----|

**OR**

- |   |   |     |    |     |
|---|---|-----|----|-----|
| 7 | Using Runge – Kutta method of fourth order, solve $\frac{dy}{dx} = x^2 - y$ , $y(0) = 1$ . Find $y(0.1)$ and $y(0.2)$ . | CO4 | L3 | 10M |
|---|---|-----|----|-----|

**UNIT-IV**

- 8 a The mean and the S.D of a population are 11,795 and 14054 respectively. If  $n = 50$ , Find 95% confidence intervals for the mean. **CO5 L4 6M**
- b Explain Errors of Sampling. **CO5 L3 4M**

**OR**

- 9 a It is claimed that a random sample of 49 tyres has a mean life of 15200 km. This sample was drawn from a population whose mean is 15150 kms and standard deviation of 1200 km. Test the significance at 0.05 level. **CO5 L4 5M**
- b A sample of 400 items is taken from a population whose standard deviation is 10. The mean of the sample is 40. Test whether the sample has come from a population with mean 38. Also calculate 95% confidence interval for the population. **CO5 L4 5M**

**UNIT-V**

- 10 To examine the hypothesis that the husbands are more intelligent than the wives, an investigator took a sample of 10 couples and administered them a test which measures the I.Q. The results are as follows: **CO6 L4 10M**

Husbands	117	105	97	105	123	109	86	78	103	107
Wives	106	98	87	104	116	95	90	69	108	85

Test the hypothesis with a reasonable test at the level of significant of 0.05 and also calculate F-test.

**OR**

- 11 a Find the maximum difference that we can expect with probability 0.95 between the mean of samples of sizes 10 and 12 from a normal population if their standard deviations are found to be 2 and 3 respectively. **CO6 L1 5M**
- b Samples of two types of electrical light bulbs were tested for length of life and following data were obtained. **CO6 L2 5M**

	Type 1	Type 2
Sample size	8	7
Sample mean	1234 hrs	1036 hrs
Sample S.D	36 hrs	40 hrs

Is the difference in the means sufficient to warrant that type I is superior to type II regarding length of life

**\*\*\* END \*\*\***
